Huawei Business is Back to **Double-digit Growth** in 2024

\$118Bn Corporate Revenue @ 2024

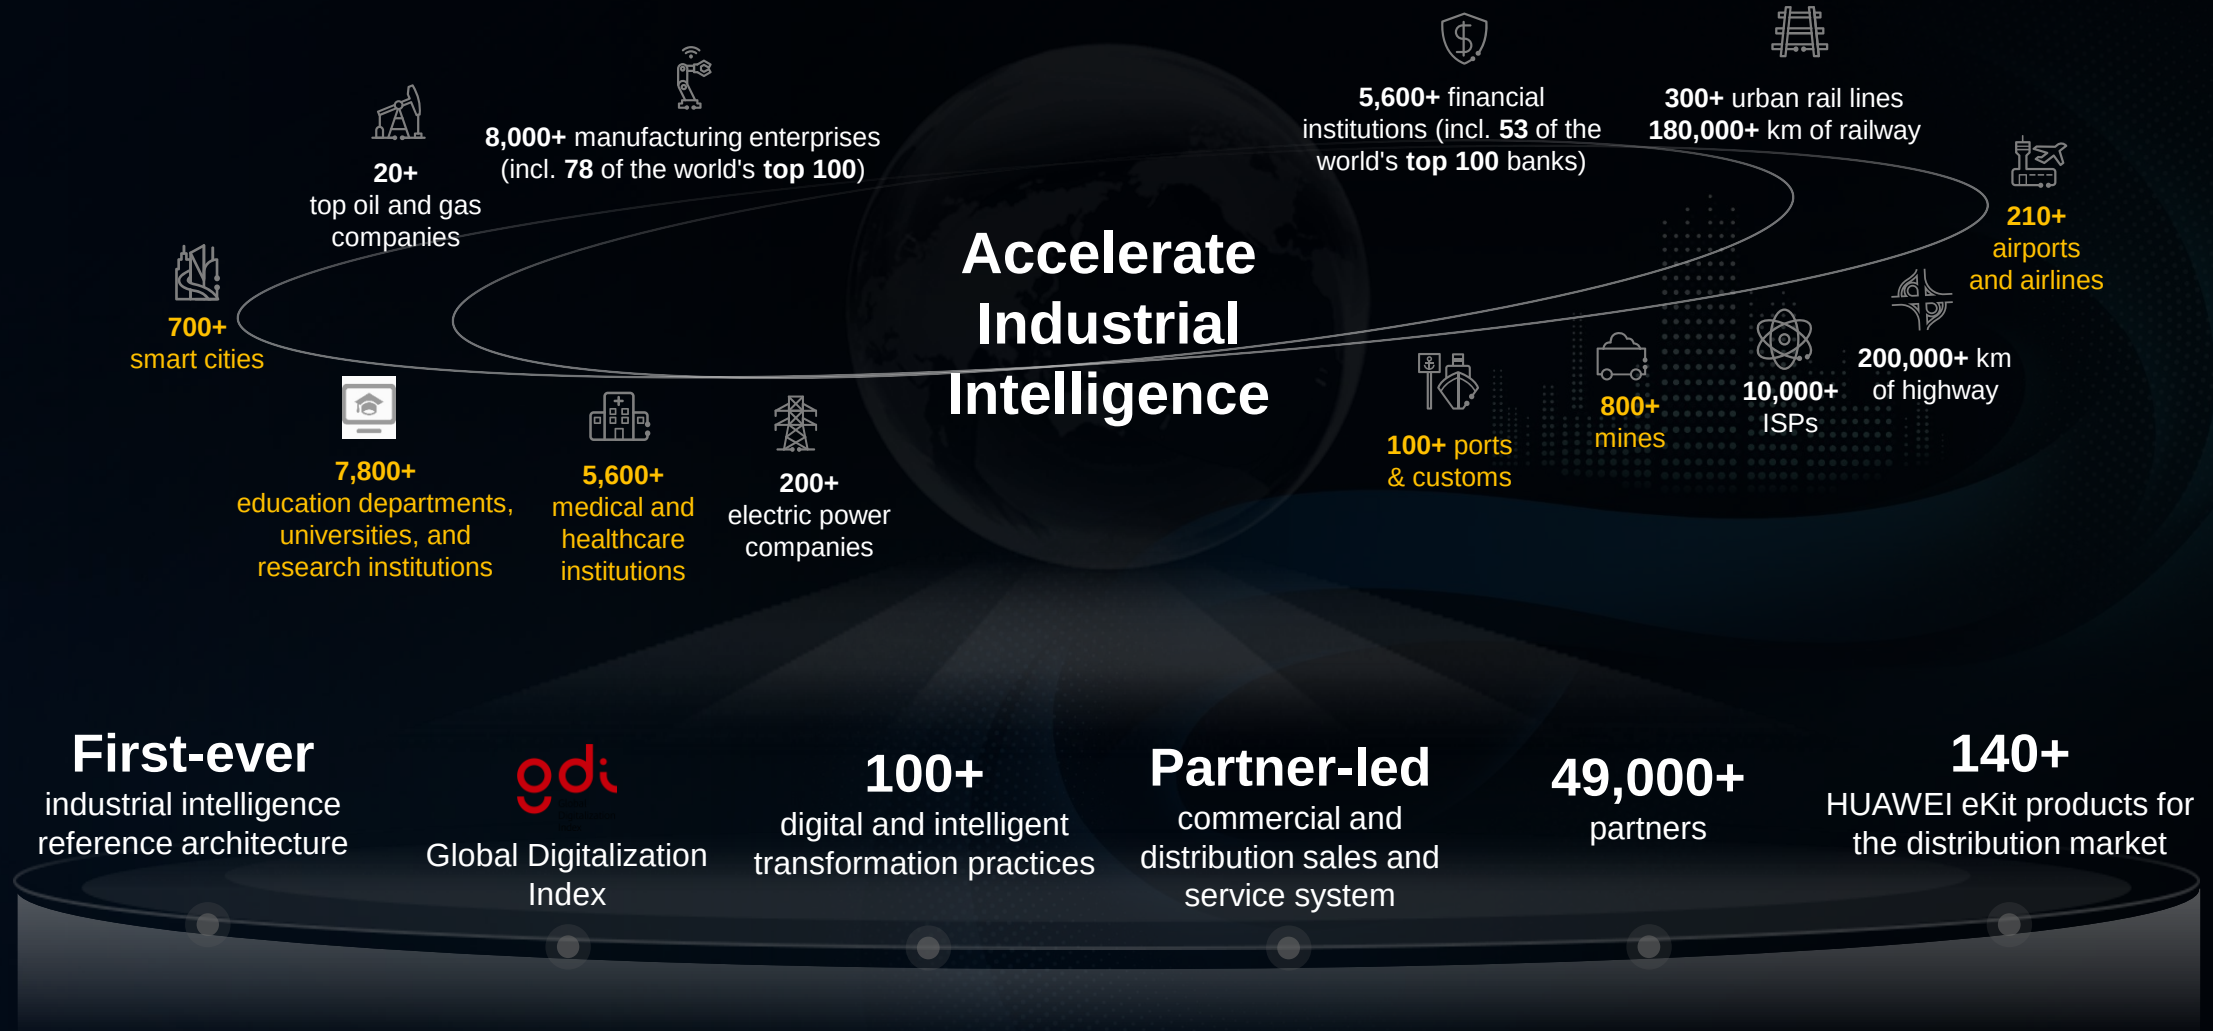

Source: Huawei financial report
USD/CNY : 7.2957

ICT Keeps **Foundation**, New Growth Bursting

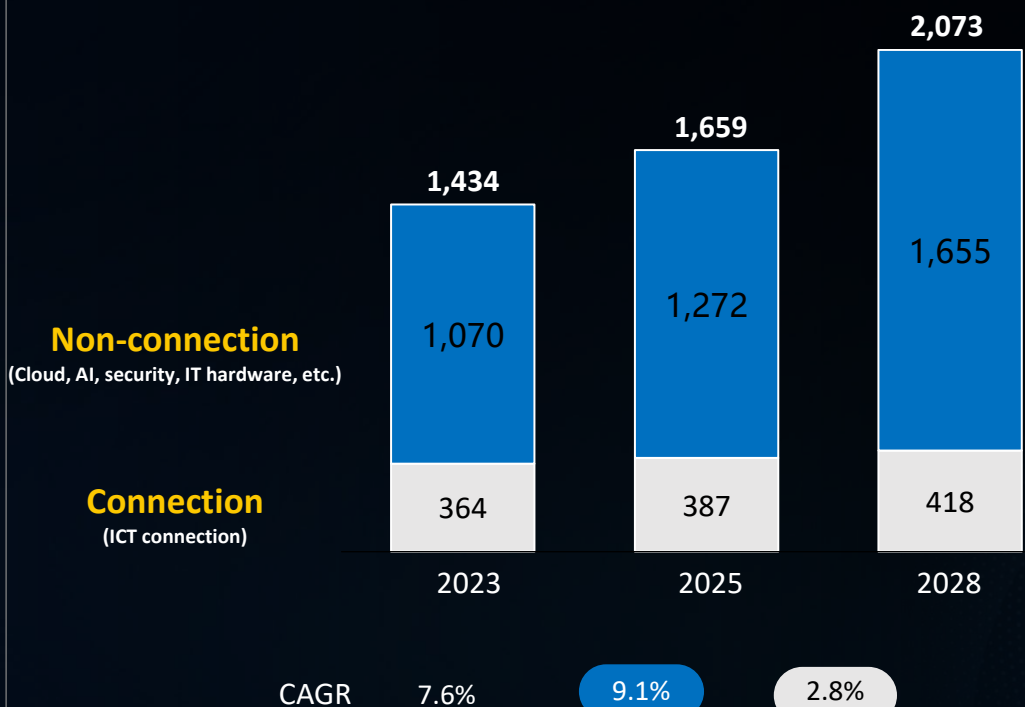

Enterprise business: Accelerating industrial intelligence and facilitating digital and intelligent economic development with customers and partners

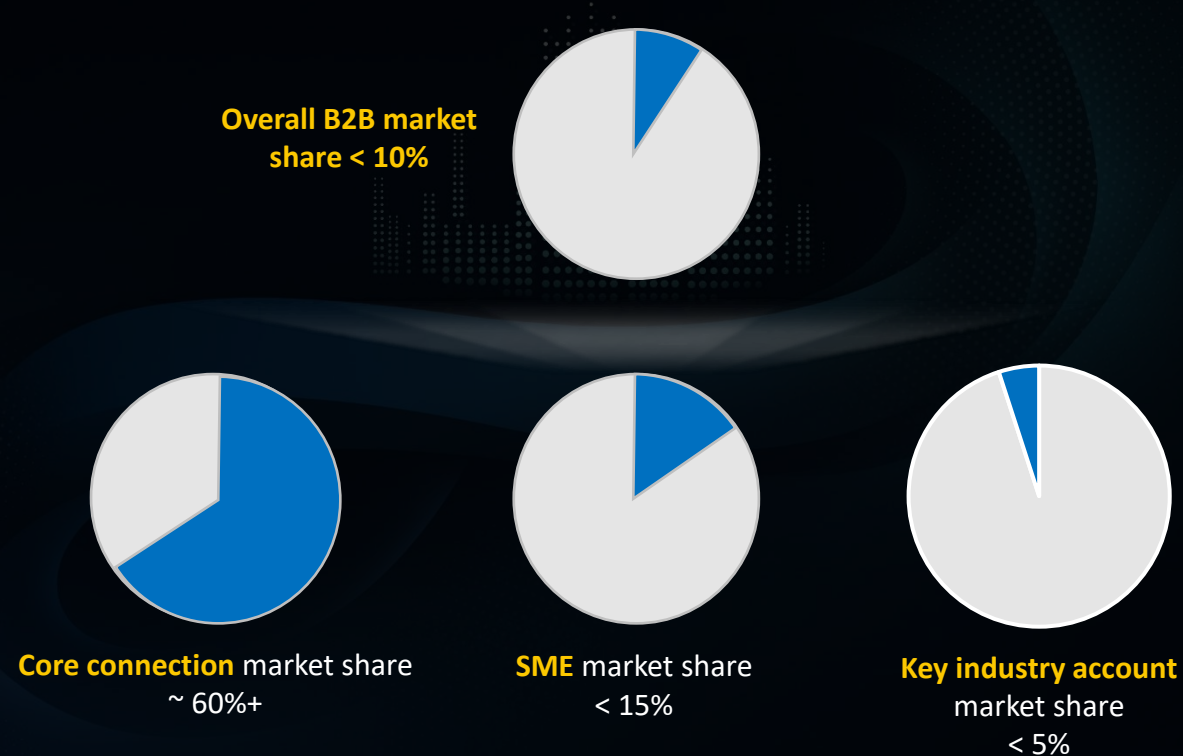

Global Insight: Stable Growth of Connection Services & Rapid Growth of Non-Connection Services of Carrier 2B Market Place

Global carriers' B2B market space (Unit: US\$ Bn)

Source: Roland Berger

Advantages in the carriers' connection market, with large growth space for the market share of SMEs and industry key accounts

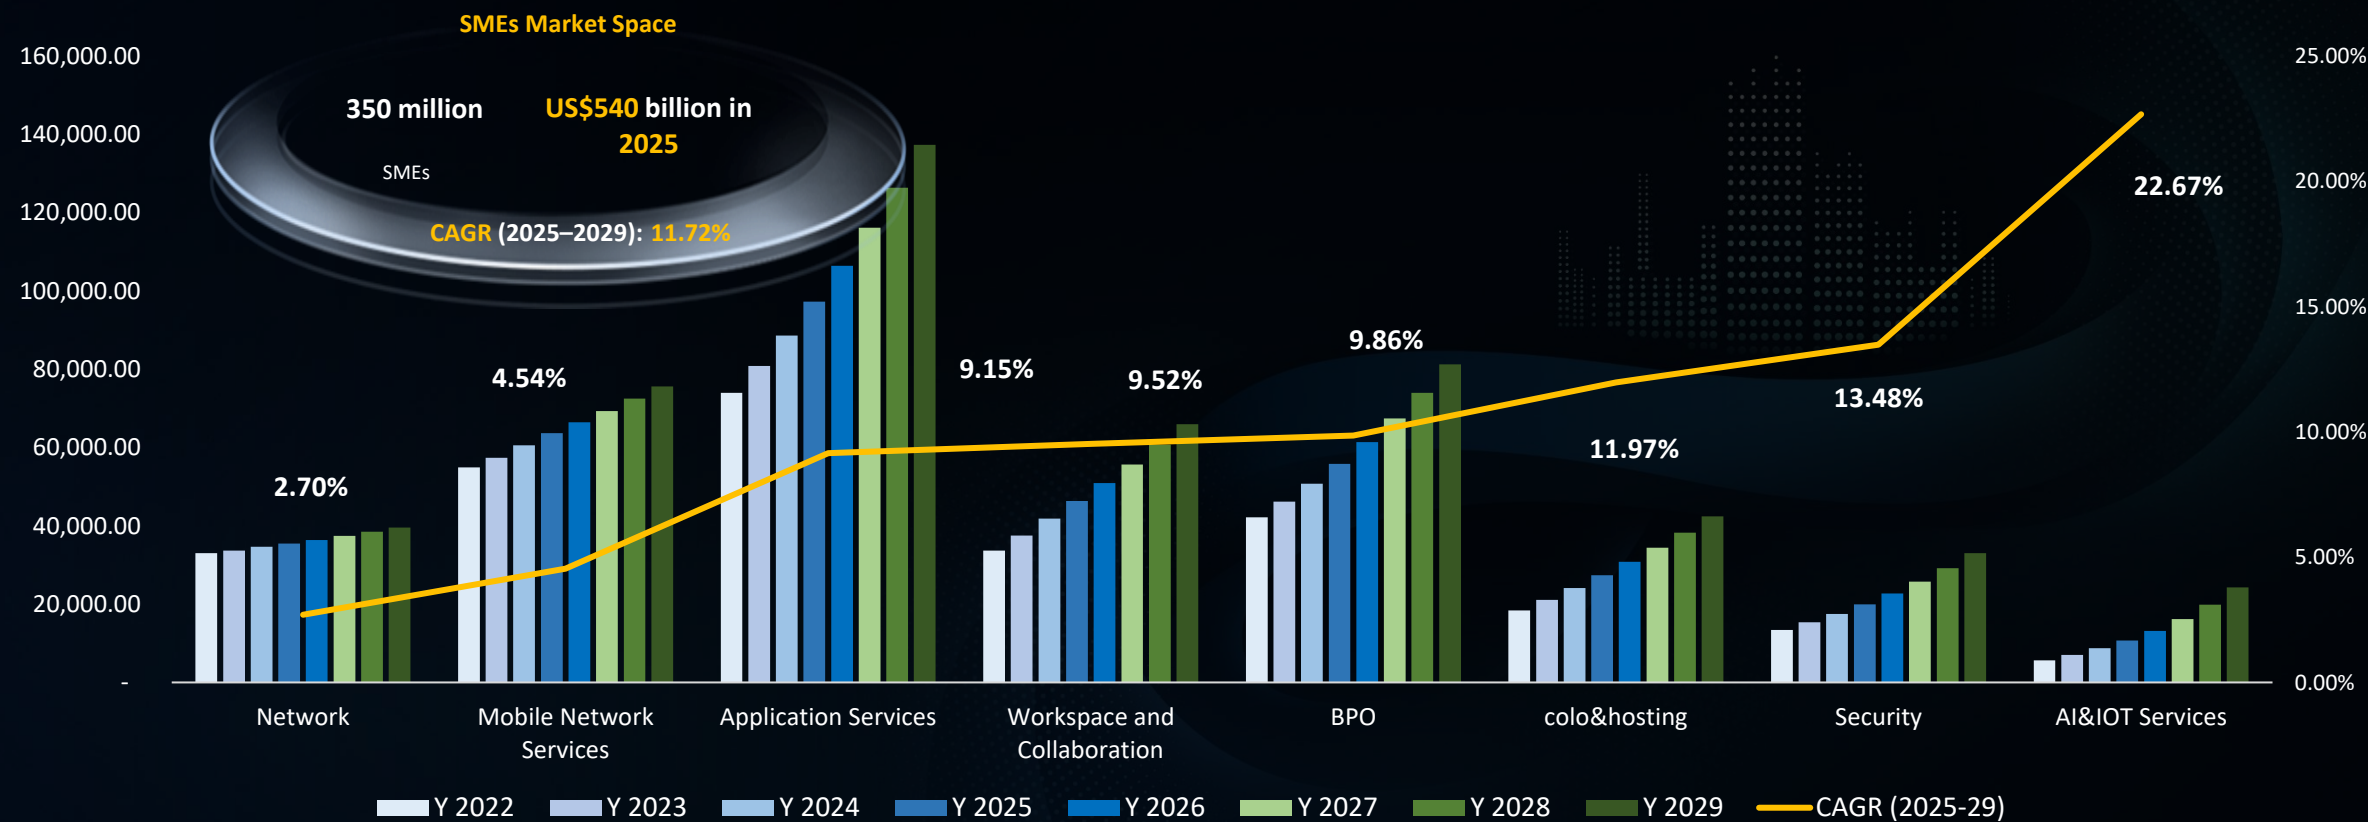

Source: Roland Berger

Global Insight: Cloud, AI, security & Managed Services Develop Rapidly in SME Market

SAM size of the SME market from 2025 to 2029 (Unit: US\$ Mn)

Market size (Unit: US\$ Mn)

Network services: Fixed broadband services, DIA, MPLS VPN, WAN/LAN

BPO: Business process outsourcing

Source: 2024 Omdia

B2B business increasing in Africa, Target Market is SME & Vertical industry

Operators put B2B business in their strategy

B2B revenue ~15%, Connectivity is the main business

2 Target Market: SME & Vertical industry

B2B business is one of the four growth engines in the OMEA region;

Enhance the market position of B2B business, Accelerate the group's digital transformation;

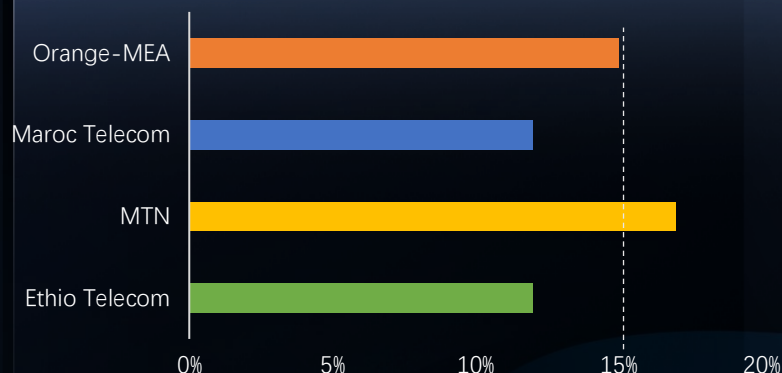

Launch the BRIDGE 2.0 strategy to accelerate the digital transformation of the industry;

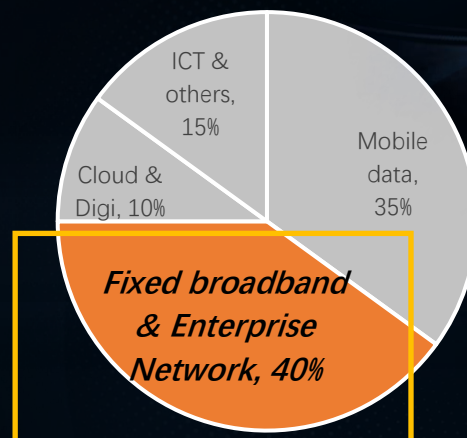

The Ambition 2025 strategy aims to double the group's B2B business revenue;

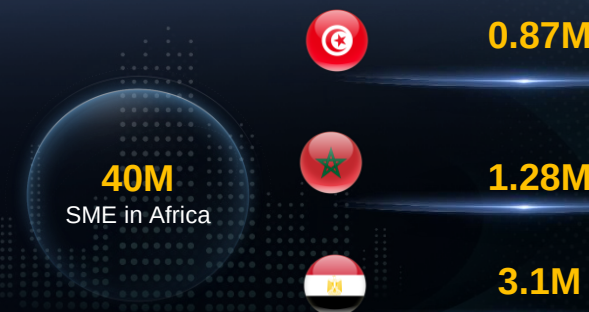

B2B revenue proportion of the main operator

EM region B2B revenue composition

Private Line for SME & SOHO

B2B Service and Practices

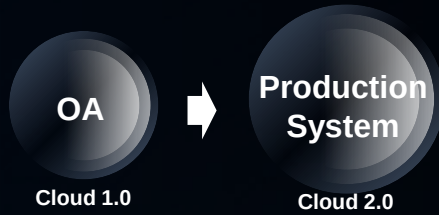

3

OMEA B2B Cooperation

"Differentiated Product & Service Package" is the Key to Win Leased Line Market

Enterprise New Changes

Experience: Quality Assurance

75% of enterprise production systems cloudified by 2025

Connection: 1 -> N

Multi public clouds for 93% of enterprises, hybrid clouds for 75% of enterprises

Source: Flexera State of the Cloud Report

Each Enterprise have Multiple Private Lines with Differentiated SLA

**Take Bank Service for example*

Service

- Online transaction
- Authentication
- DC synchronization

- ATM/VTM
- Video conference
- OA

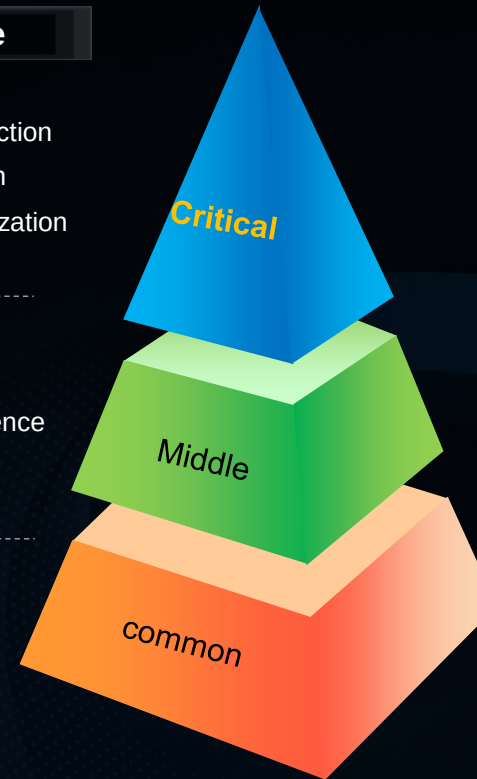

- Internet
- File transfer

SLA demands

- Highest Availability
- Security & isolation
- Latency sensitive

- QoS Configuration
- Bandwidth Flexible
- High availability

- Fast TTM
- Price sensitive

High End Product Anchoring effect

OTN Private Line

Premium (Dedicated Pipe)

Drive overall sales

IP/SD-WAN

Standard (QoS Assurance)

GPON Internet / 5G FWA

Economic (Best Effort)

Typical Scenario of 5G Private Line

1 Places with no fibers, hard to deploy

- Optical fibers cannot cover areas. It is difficult to install and commission microwave private lines for taking **35 to 49 days**

Remote gas station

Scenic Area

3 Temporary requirements, slow response to fiber deployment

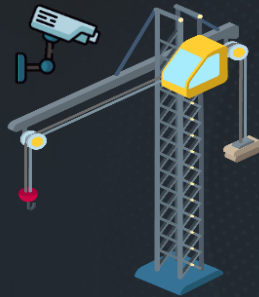

- Temporarily deploy optical fibers for up to **2 months**

Temporary Event Venues

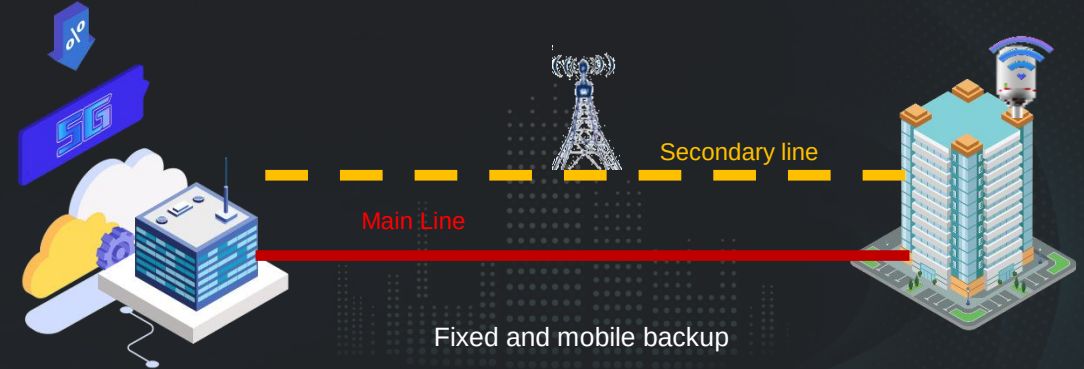

Temporary Exhibition Hall

Temporary site

2 Fibers are fragile and wireless backup is required

- 90%** of fibers in Thailand are deployed in aerial mode, and **27%** of disconnections are caused by fibers.

4 Fibers can not meet mobility requirements.

- China's outdoor daily active anchors average 46,000

Outdoor Live broadcast

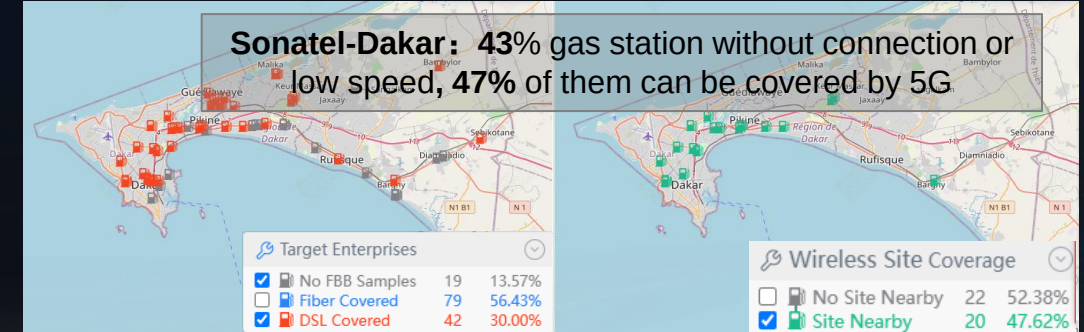

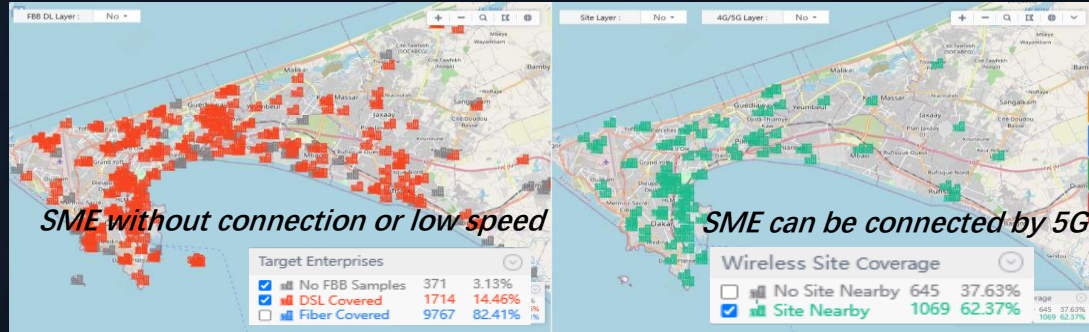

Mobile exhibition vehicle/ambulance

Large Potential for SME Connection in OMEA Region

Sonatel-Dakar: 20% SME without connection or low speed, 60% of them can be covered by 5G

VIVOCOM Won the Biggest Chain Supermarket in Bulgaria

Operator V One-Stop Service Value for Retail

Pain Points of the Chain Supermarket in Bulgaria

- 1 Price Label cannot be updated in real time.
- 2 Huge labor costs, maintaining paper label information, and supermarket staff 2-4 people
- 3 Inefficient inventory management

Supermarket Customer's Voice:

"This is a real **green** and **innovative solution** which can greatly **reduce paper usage** and **improve retail efficiency** for inventory management"

Benefits to Supermarket Customer

95% ↓ Paper label printing time
4000 tablets/week ↓ Paper label waste
30% ↑ Inventory management efficiency

Solution and Highlights

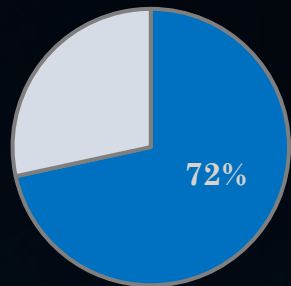

- 1 **Network plug-and-play, improving TTM:** **80%** ↑
• Store opening 7 days vs. 1 day
- 2 **Converged LAN & WAN Platform** **50%** ↓
• Unified management and network visualization
- 3 **Quick delivery:** **60%** ↓
• 2-3 Weeks vs. 2-3 Months
- 4 **Ecosystem Partner**
• ESL Provider *Hanshow* from China (one-stop delivery)

e&: Self-Owned Managed Network Boosts 2B Market Growth

Strategy & Opportunity

Transform to DICT Managed Service Provider

- **72%** FBB market share in UAE
- **450K** enterprise customers
- **30%** of the revenue from 2B

Claro: Intelligent Chancay Port by MPN Solution in Peru

Background & challenges

1st deep-water port in South America
US\$3 billion investment
15 seaport berth coverage
Intelligent tally/load/operation

Lack of digitalization
Tally delayed costs: US\$X Mn/day

Complicated network
Fiber/Wi-Fi/Waveguide...
No Unified Management

Harsh work environment
Heavy machine/Air cabin work...
High EHS risks

Autonomous fleet transportation

UL > 60 Mbps/Car with < 100 ms latency

Real time auto-management
Fleet utilization ↑ 25%

Remote crane control

< 30 ms latency

No staff on sites
Daily production improved <~15%

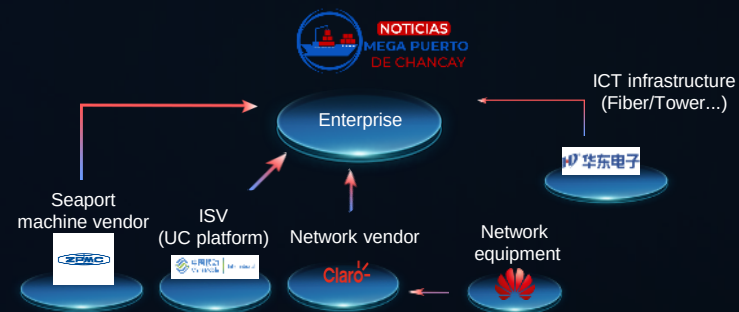

Intelligent inspection with UAV

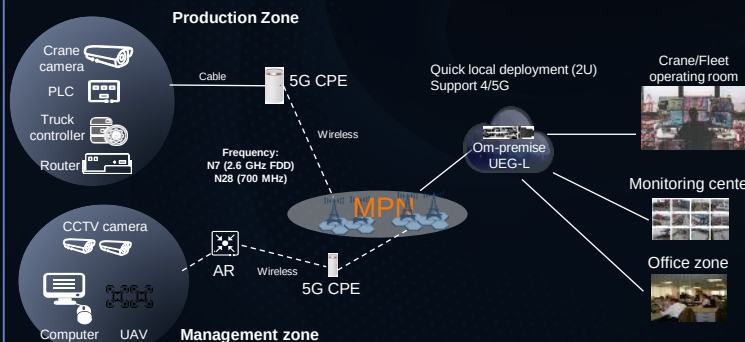

UL > 20 Mbps/Drone @ 150-m height

Full-day smart patrol
AI detection accuracy > 95%
