Blue Print To Achieve Cloud Business Success For Orange

Win in Cloud Era

Cloud Blueprint: From Orange Cloud to National Cloud & Data Center

Cloud-Network Synergy Accelerates Monetization

Internal : Go Cloud
Orange Cloud for Internal IT + 2B

External: Grow Cloud
Orange future Cloud for 2B Business

AS-IS Capabilities

- Computing (Virtualization, Container)
- Storage (Block, File, Object)
- Network (Basic)
- Backup & Disaster Recovery

To-Be Requirements

- **Enhanced IaaS** (Security as a Service...)
- Enhanced Security(HSS, WAF, CFW, DBSS....)
- **PaaS** (Cloud Native, Big Data, Database EI, Data Warehouse..)
- **SaaS** (Cloud Drive & CCTV)

Orange Future Cloud Services for Business Growth

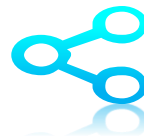

- **Cloud Hosting:** Enhanced IaaS, Enhanced Security, Industry Targeted solutions
- **Platform as a Service :** (Cloud Native, Bigdata, Database, DW, Integration...)
- **Software as a Service:** Personal Storage, CCTV, Fintech, e-Govt, e-Education, e-Tax, e-Logistics, e-Agriculture, Office VDI Collaboration, AI based Call Center, IoT, Smart Campus, ..., etc.

4G/5G

Fiber Broadband

Private line

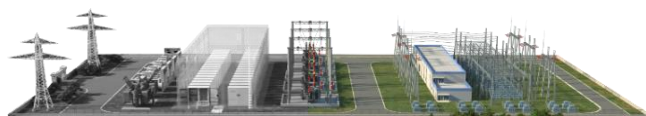

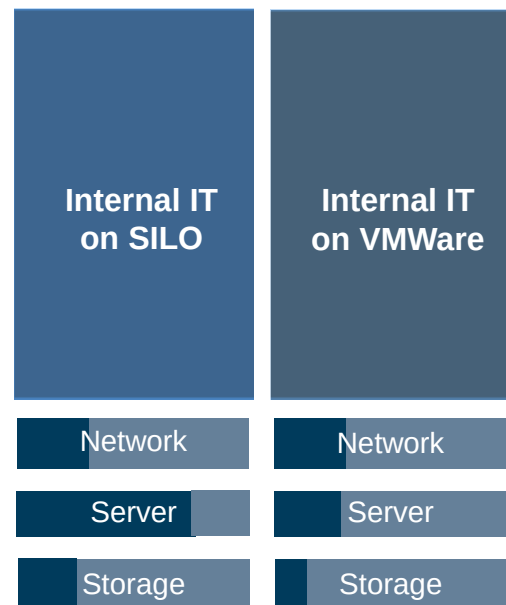

Campus

Data Center

Orange Future Oriented Target Architecture→ From Legacy to Cloud

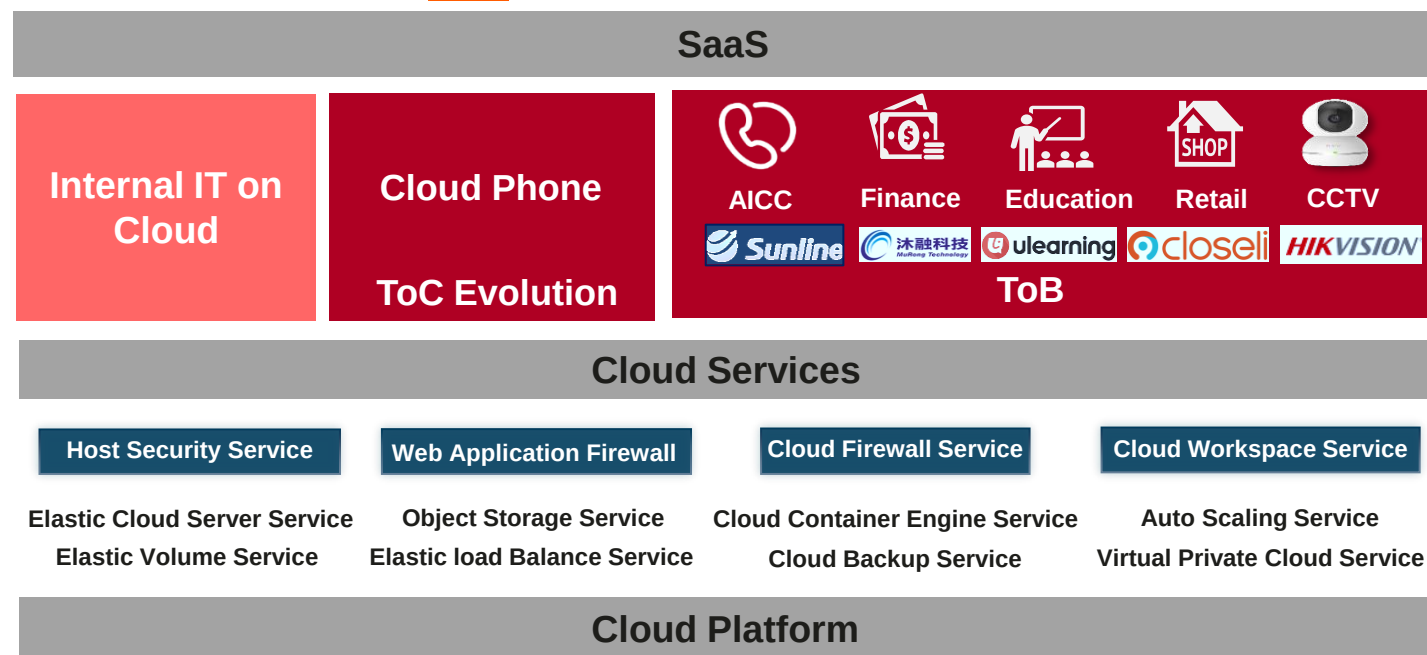

Legacy

Resource Utilization High TCO Low O&M Efficiency

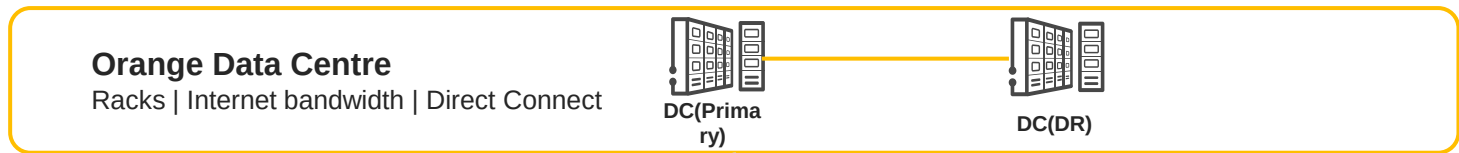

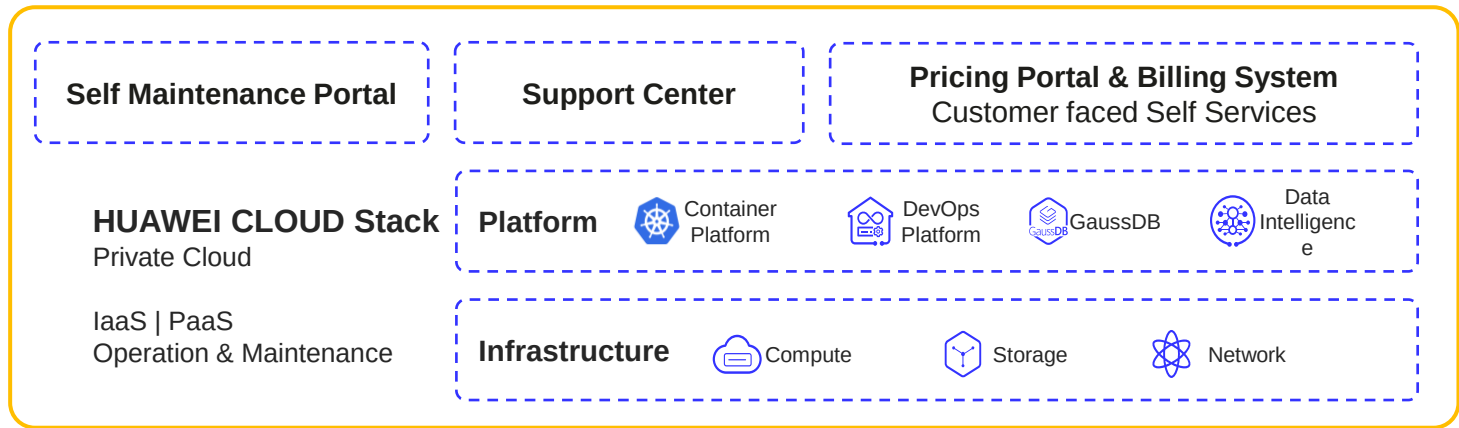

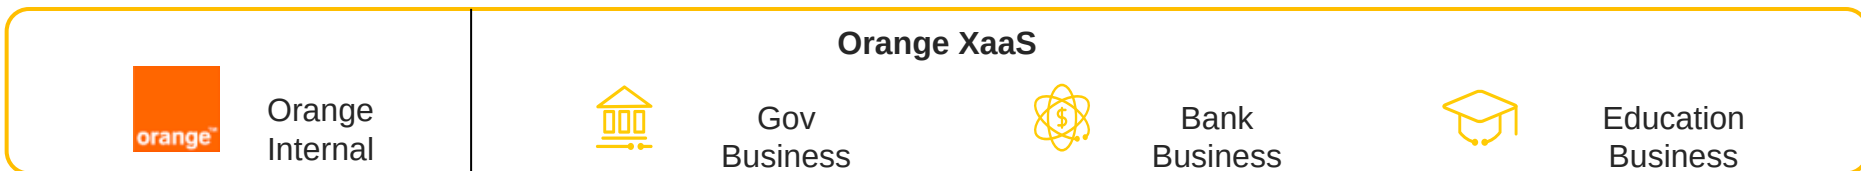

Orange National Cloud

60% Resource Usage 0 RTO 30%+ TCO 60%+ O&M Efficiency

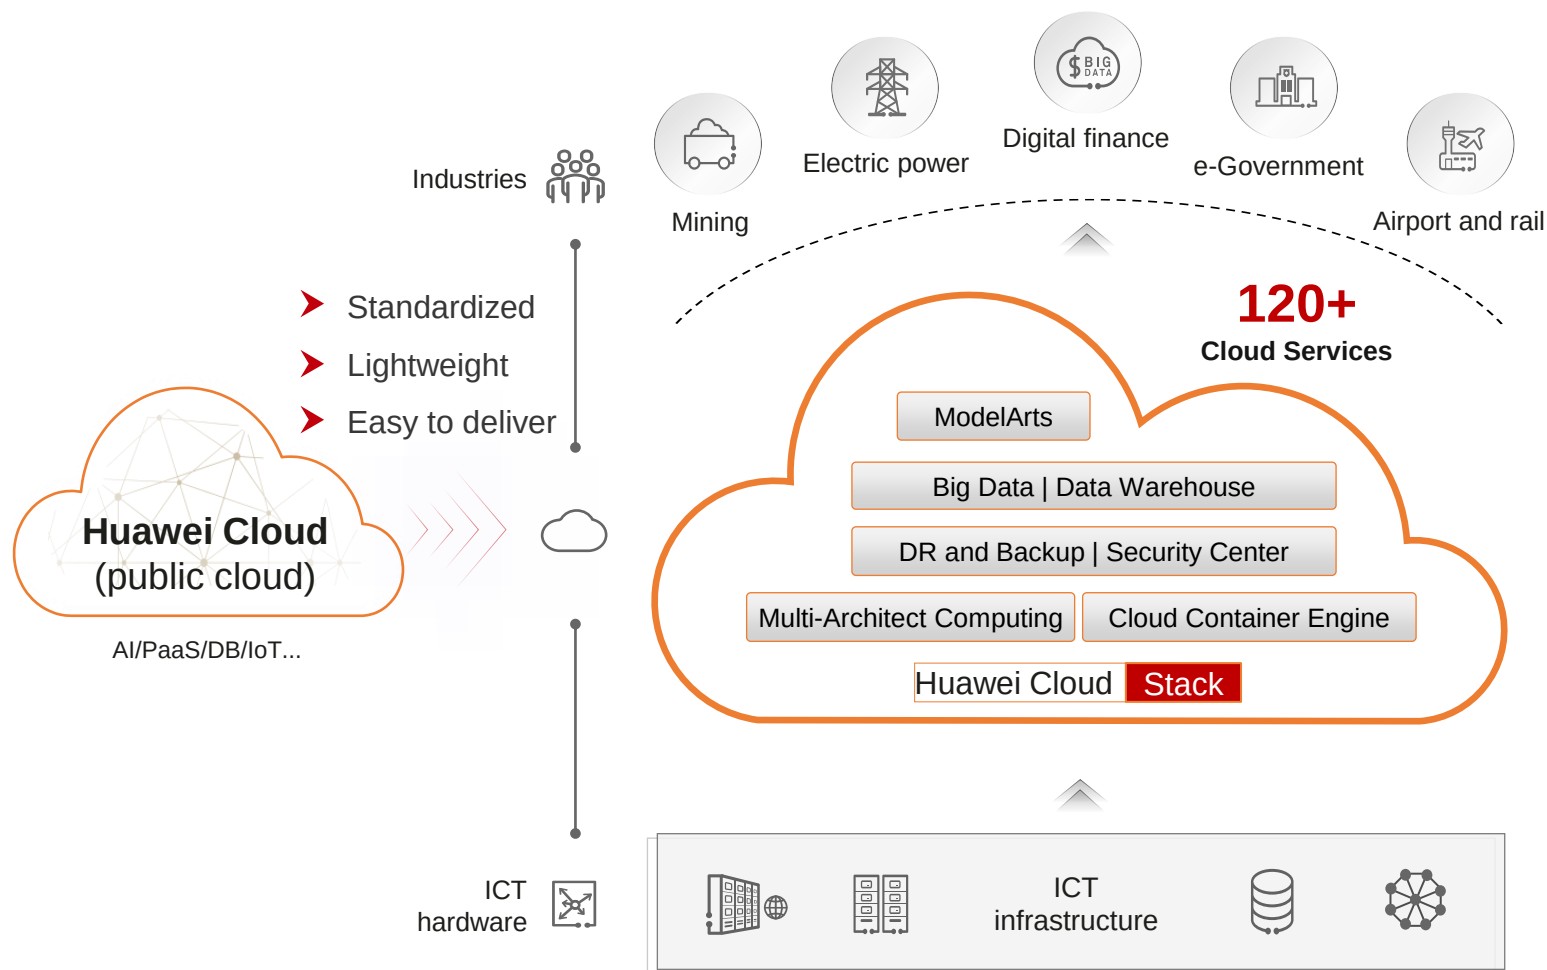

Update Your Capability of Industry, Put Our Experience to Your Excellence

A stable and Innovation Cloud for Industry:

- ✓ **Enhanced Infra:** Build A-A DR and Hybrid DR for a robust foundation
- ✓ **Agile and flexible service:** Container & DevSecOps to enable app modernization
- ✓ **Become a national cloud:** Introduce ecosystem and cloud combination to ministries
- ✓ **Enable Financial digital transformation:** Cloud foundation for Banks and Insurance, data localization
- ✓ **Driven Digital Education:** Smart education solution to enable education transformation

Huawei Cloud **Stack**, a Trusted On-Premises Cloud Solution

On-premises deployment

- **Secure**: controllable data and legally compliant data use
- **Local O&M**: unified O&M of multiple data centers
- **Collaborative**: hardware and software pre-integrated and verified before delivery

Comprehensive cloud services

- **Unified architecture**: consistent experience with Huawei Cloud
- **Keep evolving**: continuously inherit cloud services from Huawei Cloud
- **Open**: extensive ecosystem and standard APIs

ToB: Smart Office, for SMEs to Go Digitalization Internally Quickly

Smart Office Solution

Ideahub

Smart Office Bundle Offer

What to sell?

How to sell?

24 Month Contract @ 400 USD/Month, 200 USD Set up fee

Key Cost Input for BP	USD
IdeaHub	2500
Internet 20Mbps	300
One Office for 10 persons/2 Year	960
Maintain Service Cost / Month	20
Capital Cost Per Month 0.5%	
Cloud Meeting Cost per/ Month	20

ToB: Smart CCTV, for SMEs Security and Detection

Smart CCTV Solution

Solution Value

Orange 2B Cloud

- Video AI Recognition
- Cloud Video Storage

VMS Mobile APP

VMS PC Client

Perimeter detection

Intrusion Protection

Motion Detection & Voice Alarm

- Rights & domain management
- Real-time Monitoring
- Video Cloud Storage

- Video playback
- Video sequencing
- AI Detection

Smart CCTV Bundle Offer

What to sell?

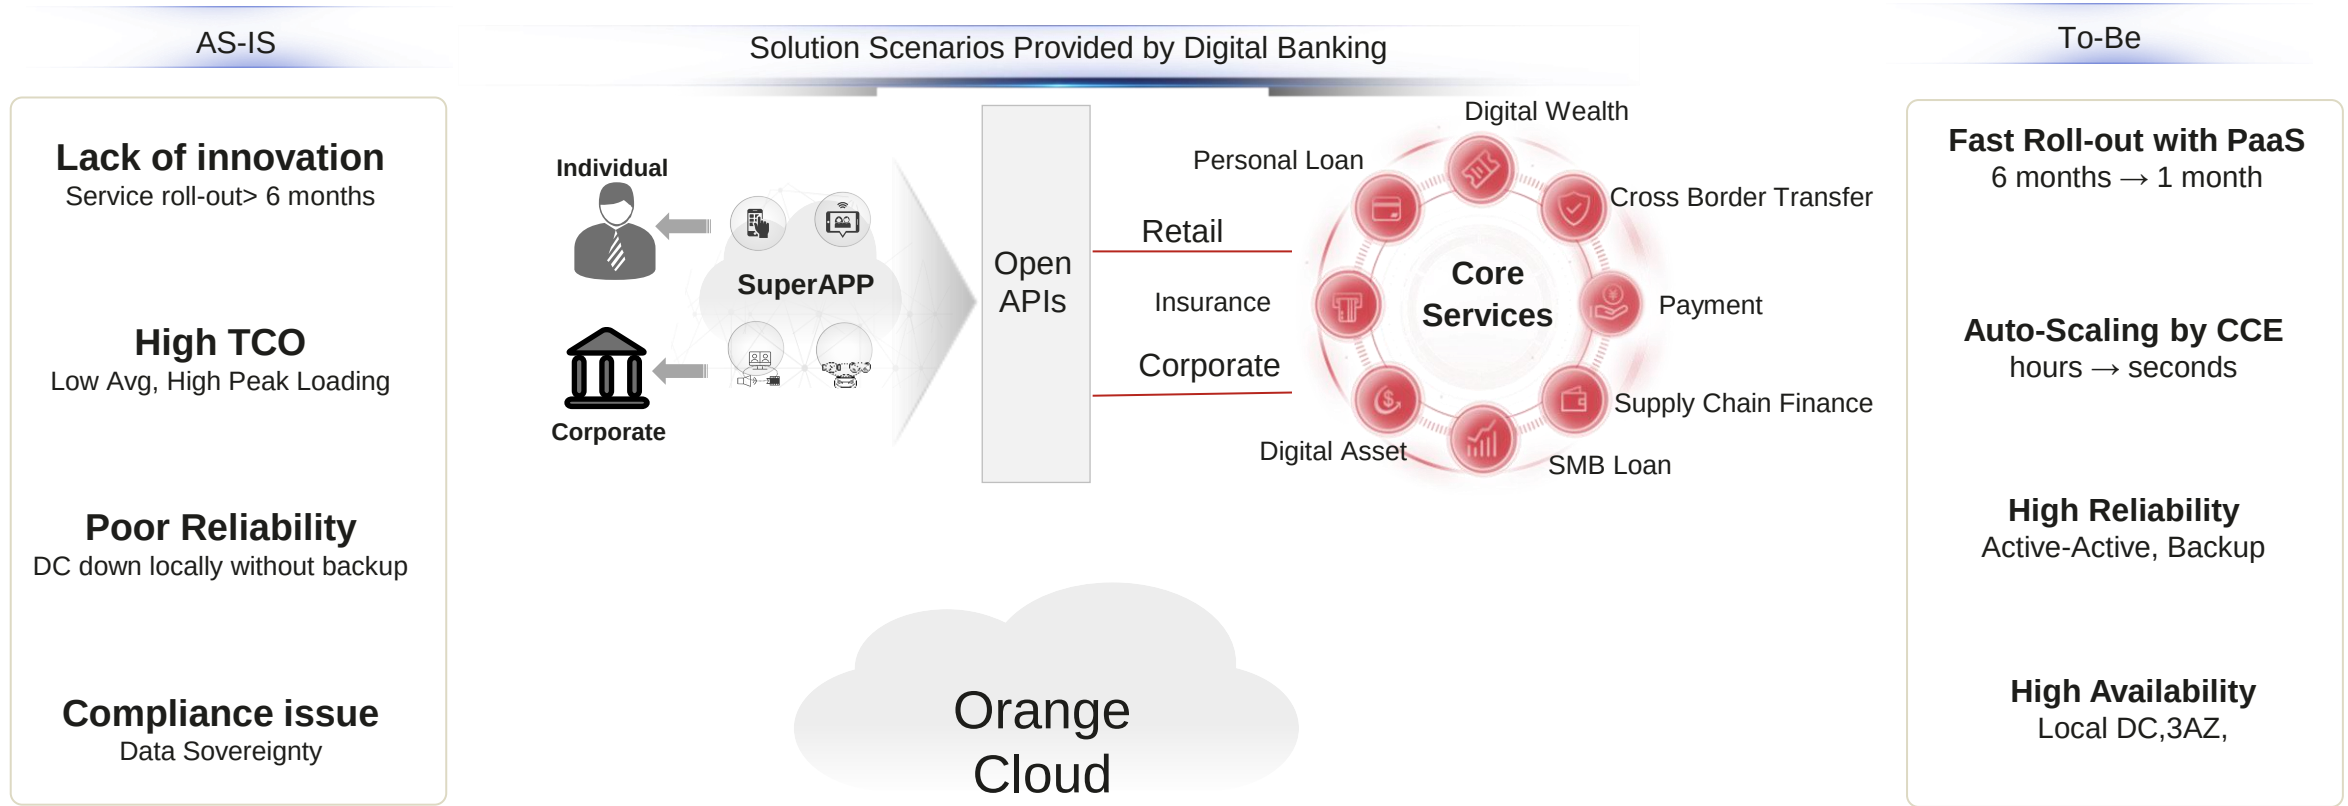

How to sell?

12 Month Contract @ 100USD/Month, 200 USD Set up fee

Key Cost Input for BP	USD
Camera*5	300
Internet 20Mbps	300
VMS for 5 Camera	80
7 Days for storage for 5 Camera	50
Capital Cost Per Month 0.5%	
O&M cost per month	20

ToB: Digital Banking Enables Reform and Move Ahead to better Serve Customers

Quick deployment

Earned digital banking
license from MAS

Singapore's first digital bank

Fast rolled out digital banking services

Service innovation

Rapidly innovated services
such as digital loans

Thailand's second largest bank

250,000+ users in 6 months

Digital banking

Super apps for a
super ecosystem

Top 3 bank in Kenya

8M users increasing in 8 Months

ToB: Orange Cloud Educational

Full Stack Solution (Cloud IaaS/SaaS, Network & Terminal)

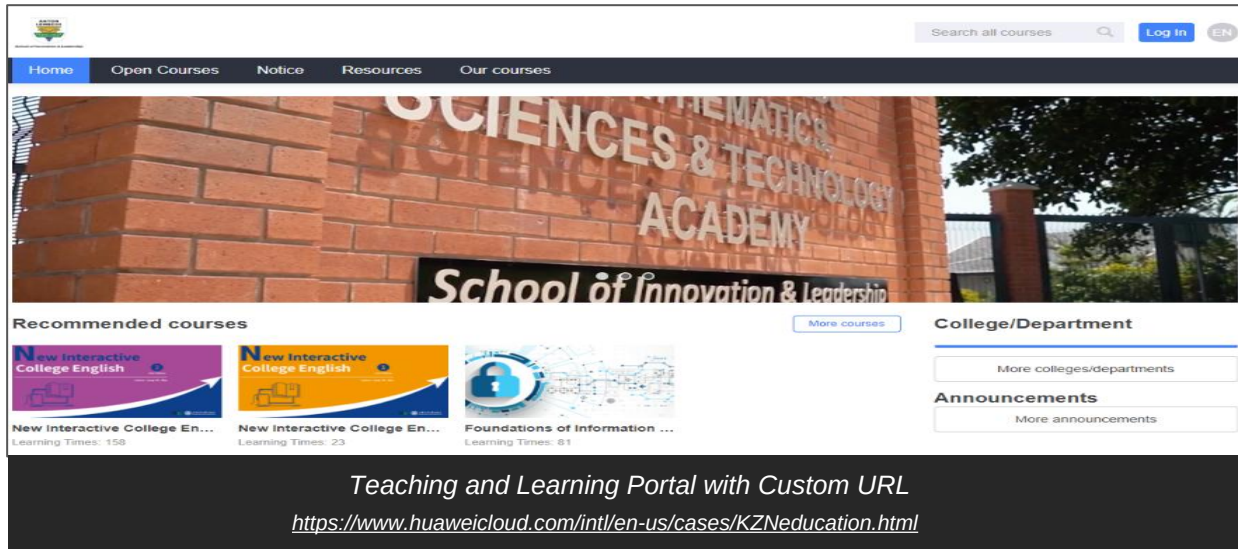

Customer Benefits:

1. Workspace provides unified platform to university IT administrator to manage the cloud apps
2. Can quickly add or delete apps to end user desktop, mobile phone
3. Save lot of operational cost for customer IT for cloud management for end users
4. Support education users for GPU related business transactions, such as machine learning, Increase revenue on cloud consumption
5. Lower unit costs for both school & students

ToB: Digital Educational Success Case

1) School case: South Africa's Smart K-12 Education - Schools of KZN province using IdeaHub and U-Class System for Online

KZN DoE constructs smart classroom in pilot schools.
Pilot schools use IdeaHub with U-Class System for smart classroom teaching
Support physical classroom, hybrid (physical + synchronous) teaching mode and 100% online modes

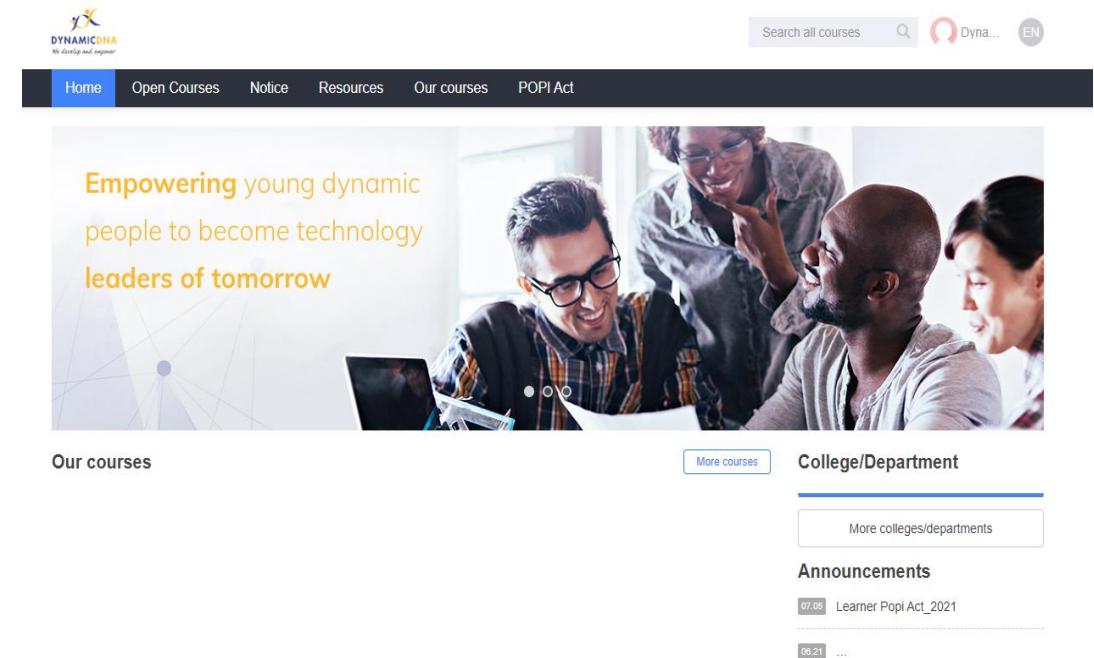

Making classroom teaching highly engaging, efficient and effective with U-Class and IdeaHub.

Teacher Training Session
IdeaHub + U-Class Introduction

2) Business Case: Dynamic DNA: Using ULMS for Digital Transformation of Training

Professional education institution: DynamicDNA is a well-known content & service provider with 10+ years of local professional training experience in South Africa.
It aggregates all training content resources into one centralized platform for training and knowledge sharing. ULMS enables the institution in its transformation of training from traditional offline mode to online and hybrid modes to adapt to the New Normal environment due to outbreak.

ToC: Innovative 4G Cloud Phone to Accelerate 4G migration for Africa Market

4G Cloud Phone = 4G Feature phone + Cloud Installed APP = 4G Smartphone

**Typical Configuration Meet Most Requirements:
2/3/4G, VoLTE, Popular Apps, Type-C Interface**

MCP	128MB + 48MB	Band	GSM: 900/1800MHz
Screen size	2.8" QVGA		WCDMA: 900/2100MHz
Camera	0.08MP		LTE-FDD: Customized by operators
Connectivity	BT/ USB/ FM	T-card Flash	up to 128GB
SIM card slot	Dual card slot	VoLTE for voice	Yes
OS	MOCOR	Battery/Charging Data Interface	1800mAh/Type-C

in Southern Africa:

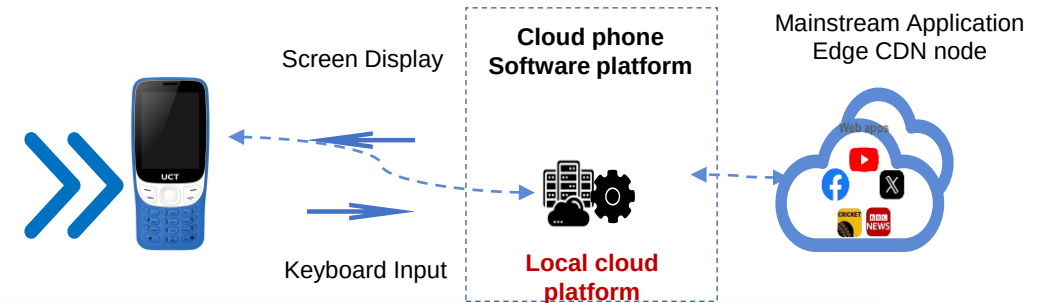

< 48%

4G/5G smartphone

> 52%

low-end Feature Phone

4G cloud phone (\$14 FOB)

Attractive Device Price: 1/3 price of 4G Smartphone

- ✓ Affordable substitute of 4G smartphone, around 14USD (FOB)
- ✓ Support mainstream configuration: 2/3/4G, camera, Type C
- ✓ Supports top 10 apps: e.g. Facebook, Tik Tok

High DOU Capability: Comparable to 4G Smartphone

- ✓ Data traffic consumption per hour > 150MB
- ✓ Data traffic consumption per month > 10GB
- ✓ Live network test: Daily data traffic consumption is 1.4GB

Long Battery Life: Active State > 1 day

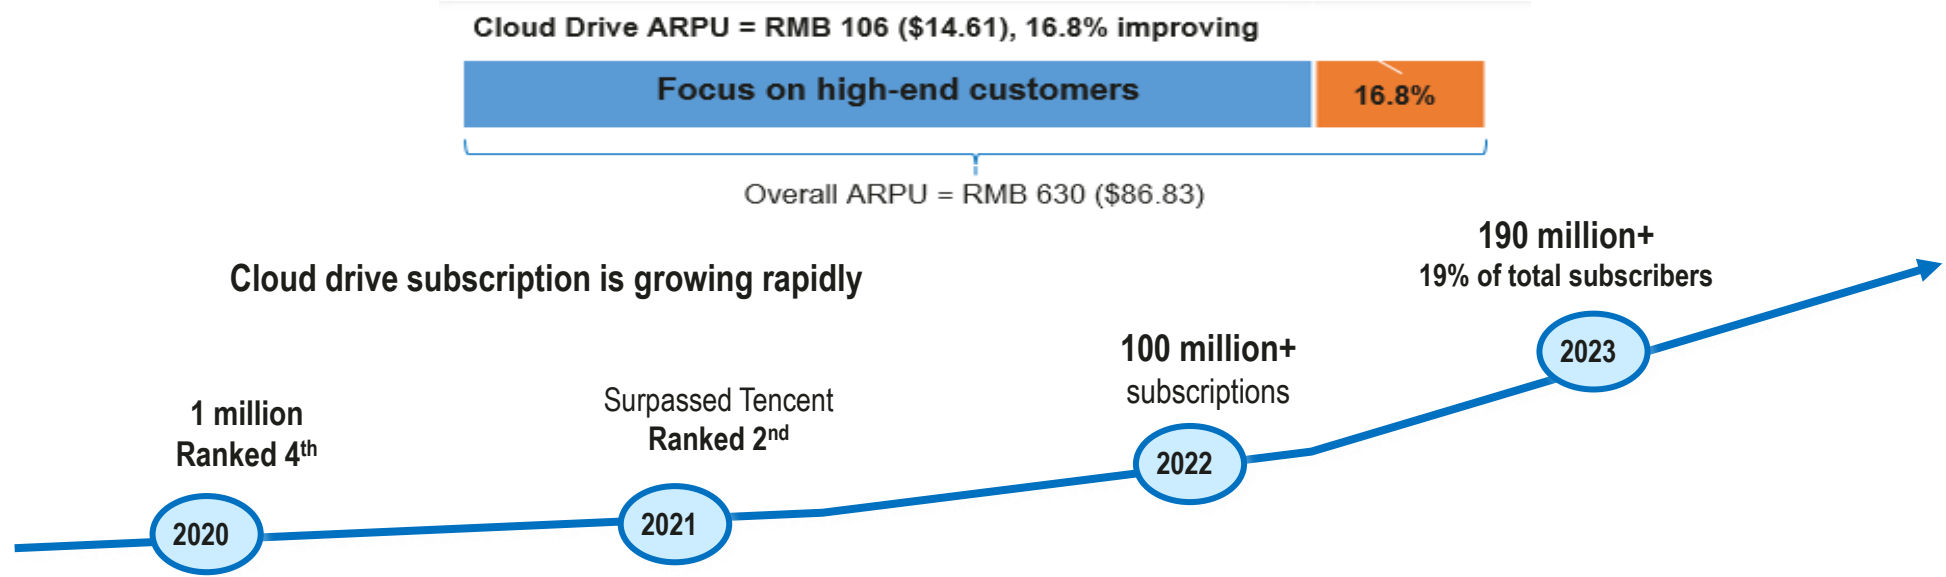

- ✓ Power saving compared with smartphone and feature phone
- ✓ Battery life@1.8KmAh comparable to flagship smartphone@5KmAh
- ✓ Capacity can be customized to 2KmAh, further increase by 10%.

More Business Opportunities By Self-Owned Cloud

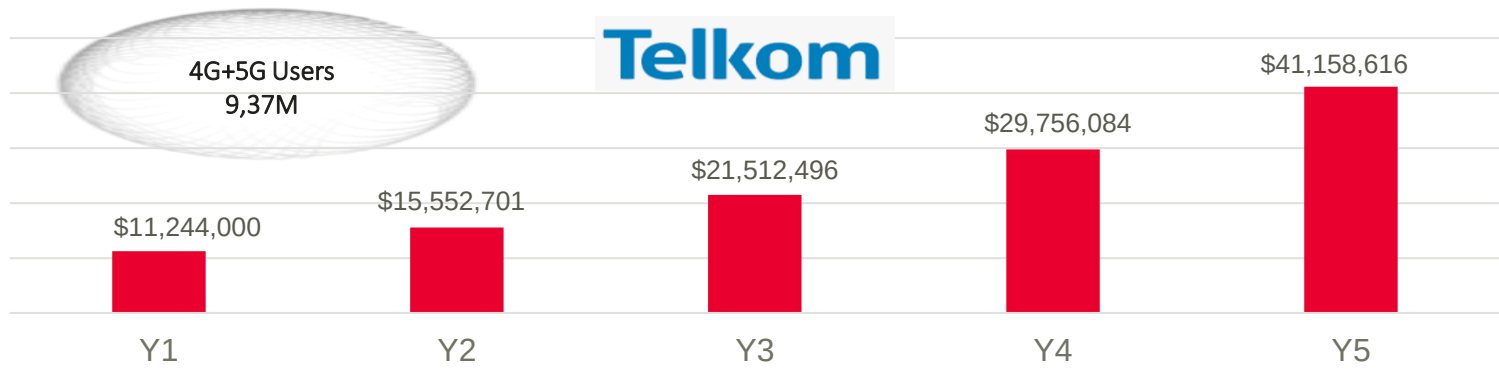

- ✓ Data traffic consumption increase by 2~3 times
- ✓ Reduce cross-network and save costs
- ✓ Support app expansion, mode innovation, etc
- ✓ Increases Orange Money Users

ToC: Cloud Drive: A New Digital Service with Very High Potential

China Mobile has 200x cloud drive subscription growth in 4 years

Cloud Drive Business Planning → Telkom South Africa

Market Space for My Telkom Drive:

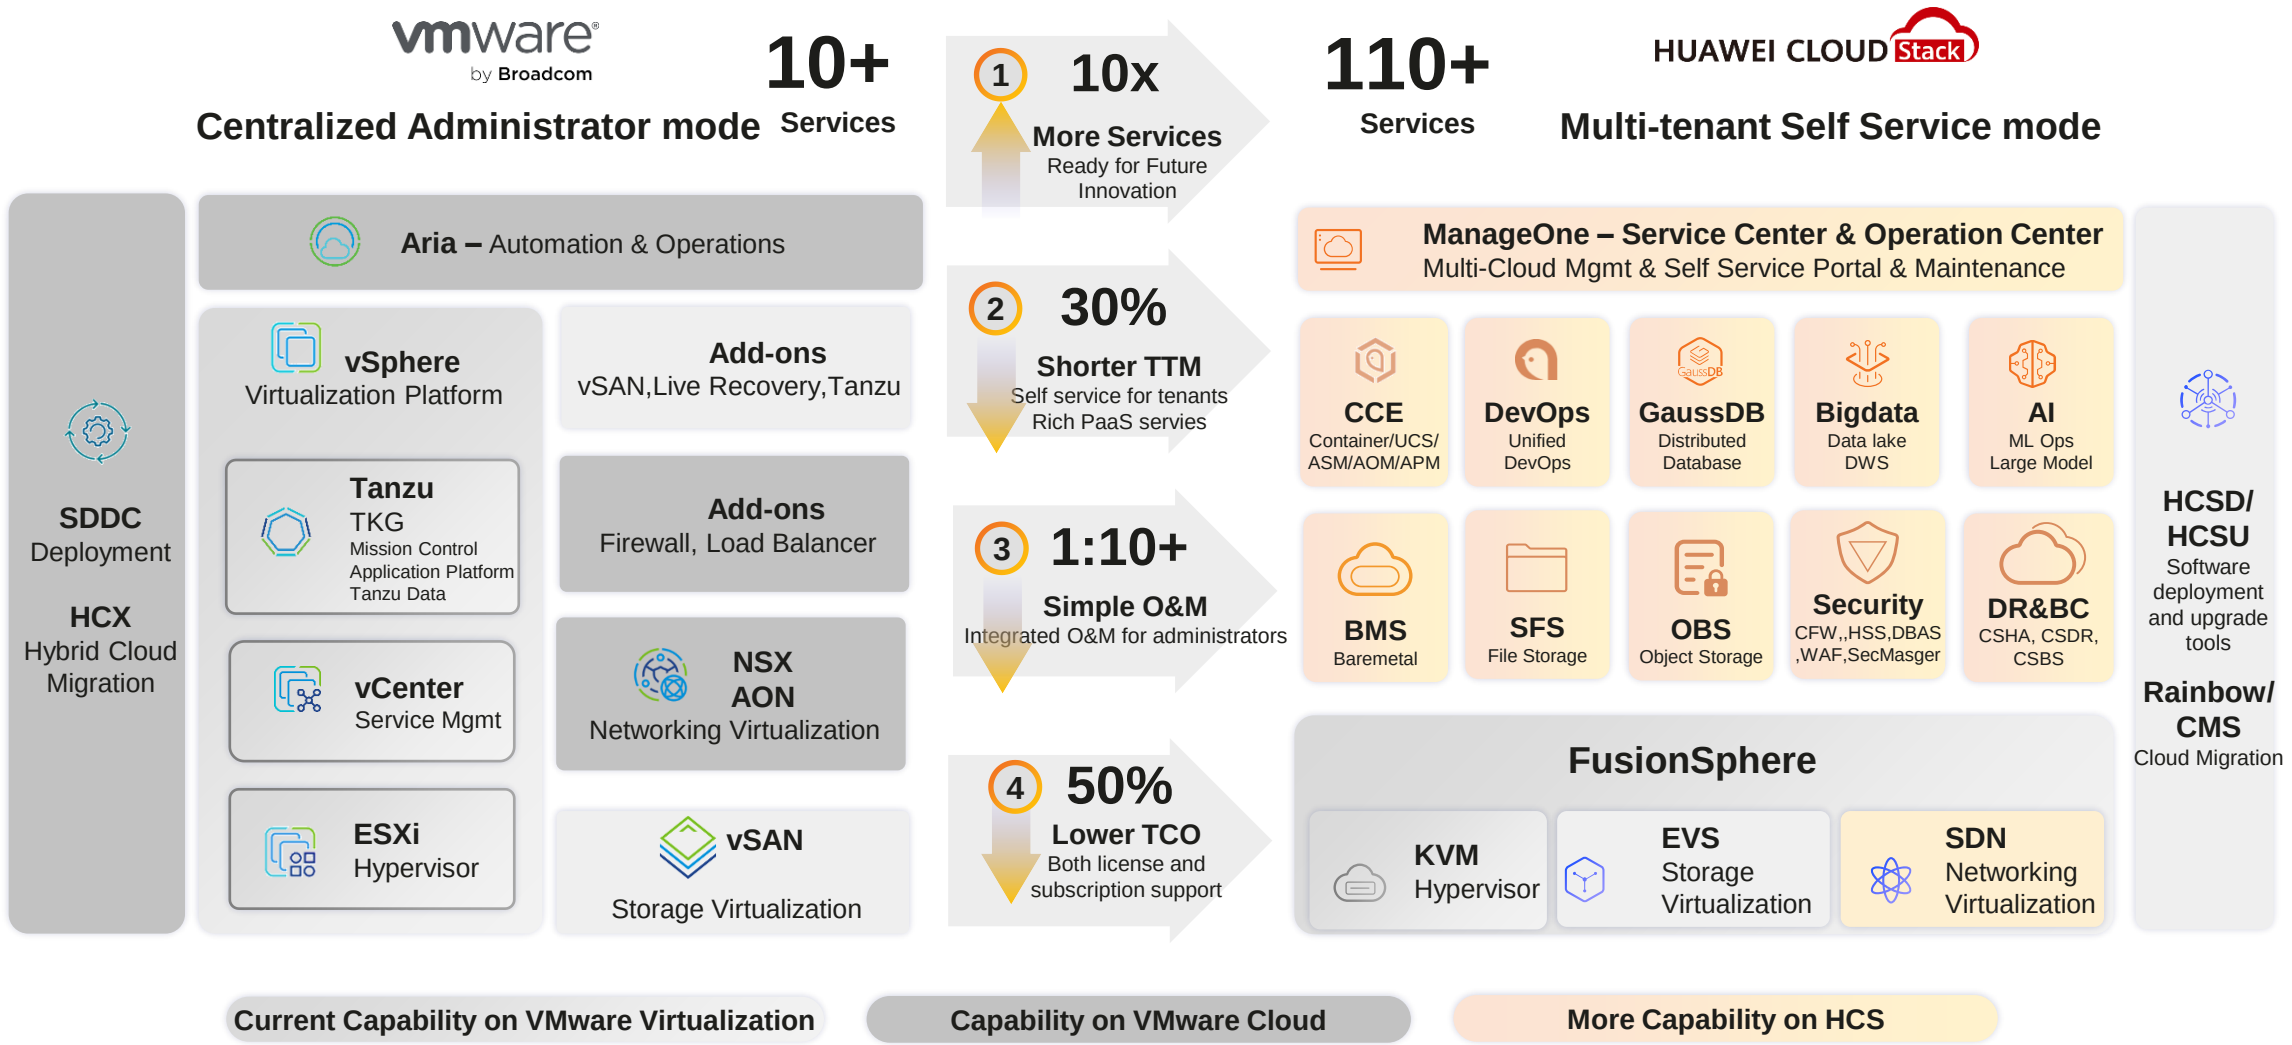

+\$119M / 5Years

High Value Users → **5%**

2\$/M → **24\$/Year ARPU**

Internal IT cloudification: More Services, Lower TCO, Shorter TTM, Easier O&M for Business Innovation

Huawei Proposal Summary: Three Domain Innovation

Internal IT Transformation

- Huawei HCS for Internal IT
- Digital Finance on Huawei HCS

Key Target

- Build Digital Infrastructure
 - Reduce TCO by 30%

Computing

Enhanced (IaaS + PaaS + SaaS)

Explore 2B/2G Market

Strategy Alignment and next step planning Suggestion's

1

Explore **Cloud 2B market** in 2025

- **Joint Team formulation** Explore appropriate external **Cloud 2B scenarios** based on the Huawei cloud platform.
- *Expand Cloud 2B Business.*

2

Design the **Cloud Phone/ Drive project** in 2025-2026

- *Align **Cloud Phone/ Drive scenarios** with 'Digital New Service Marketing Dept' based on the HCS.*
- **Huawei can provide end-to-end support** from cloud platforms to these project.

3

Design for the **Internal IT Cloudification & New Growth Platform** in 2026

- *Internal Cloud Modernization: **cloudification POC plan**, and gradually deploy some internal IT workloads on the cloud with target to **reduce TCO BY 30%+***
- *MM cloudification.*

Key Points

Business Value

1. Building a cloud platform can shift IT from a cost center to an operations center.
2. Cloud services can deepen contact with users and increase dependency and revenue
3. Currently more than 250+ operators are using Huawei cloud platform as the foundation for digital transformation.
Orange has five affiliates using Huawei cloud platform.
4. Current Recommended Services: ECS、EVS、ELB、EIP、HBR(Backup Service)、Migration/DR Service etc.

Technical Value

1. The cloud service platform can work with the original VMware platform to implement service DR.
2. Standardized and automated IT processes can be built to quickly apply new technologies,such as Cloud native,AI etc.
3. Unified resource management: CEM, Mobile Money, Bigdata, and internal IT (OA、ERP、VAS、BI、HR Finance、and so on).services are managed in one cloud.

Delivery time

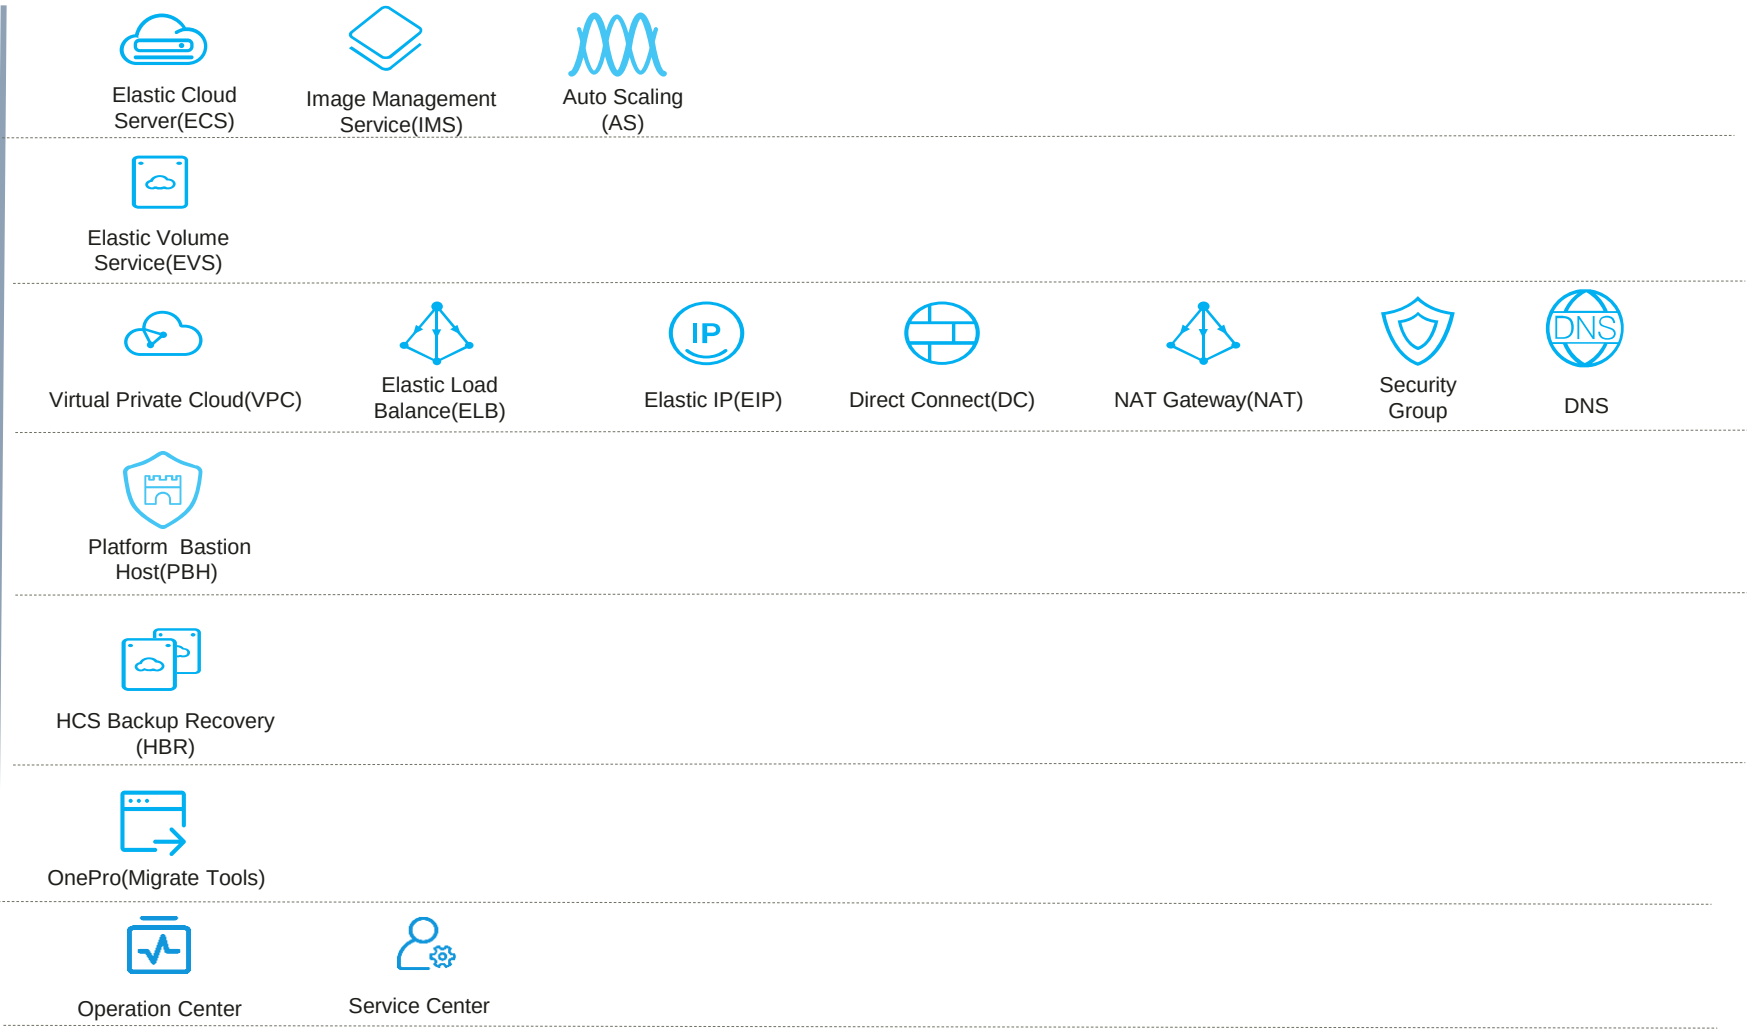

1. Shipping time: 40 days, Delivery time: 30 days
2. Current resource: Cpu:2790 Cores, Memroy:9480GB, Production Storage:300TB,Backup Storage:400TB

Training and service cycle

1. Free training services are provided. Three-year maintenance services are provided for the hardware and software provided.

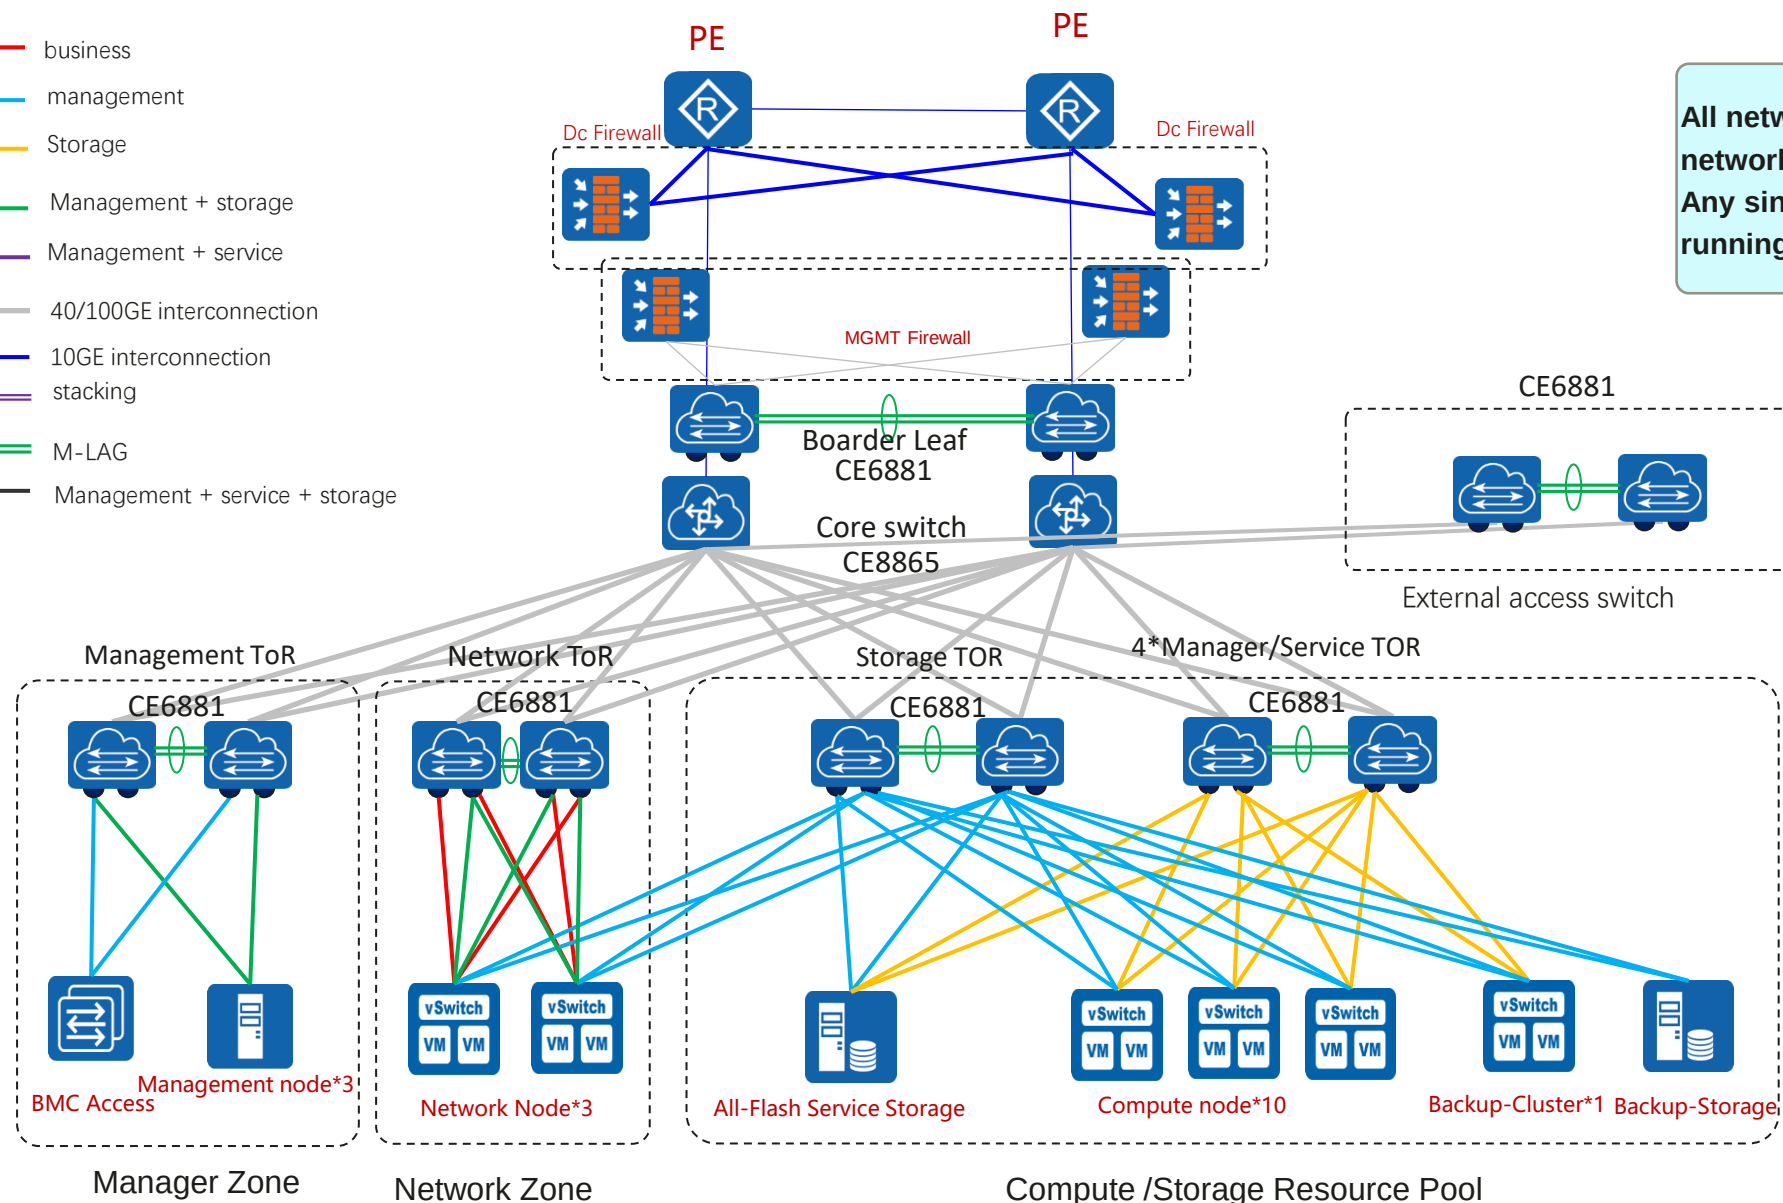

Cloud Service Design

Computing Service	Provides virtualization, bare metal, and auto scaling capabilities.
Storage Service	Provides block storage capabilities and supports NAS/object expansion.
Network Service	Provides software-defined network capabilities
Security Service	Provides cloud security capabilities
BC&DR Service	Provides cloud backup and disaster recovery capabilities.
Migration Service	Provides service migration capabilities.
Mgt Service	Provides unified management and O&M capabilities.

Cloud topology architecture design

- business
- management
- Storage
- Management + storage
- Management + service
- 40/100GE interconnection
- 10GE interconnection
- stacking
- M-LAG
- Management + service + storage

All network devices, management nodes, and network nodes adopt the high-reliability design. Any single point of failure does not affect service running.

Boarder area(Internet/higher education Access)

- 2*Router
- 2* Boarder FW(URL/IPS/AV)

Core switch zone

- 2* Core Switch(40GE.M-LAG)

Dedicated lineaccess

- 2*10GE Switch

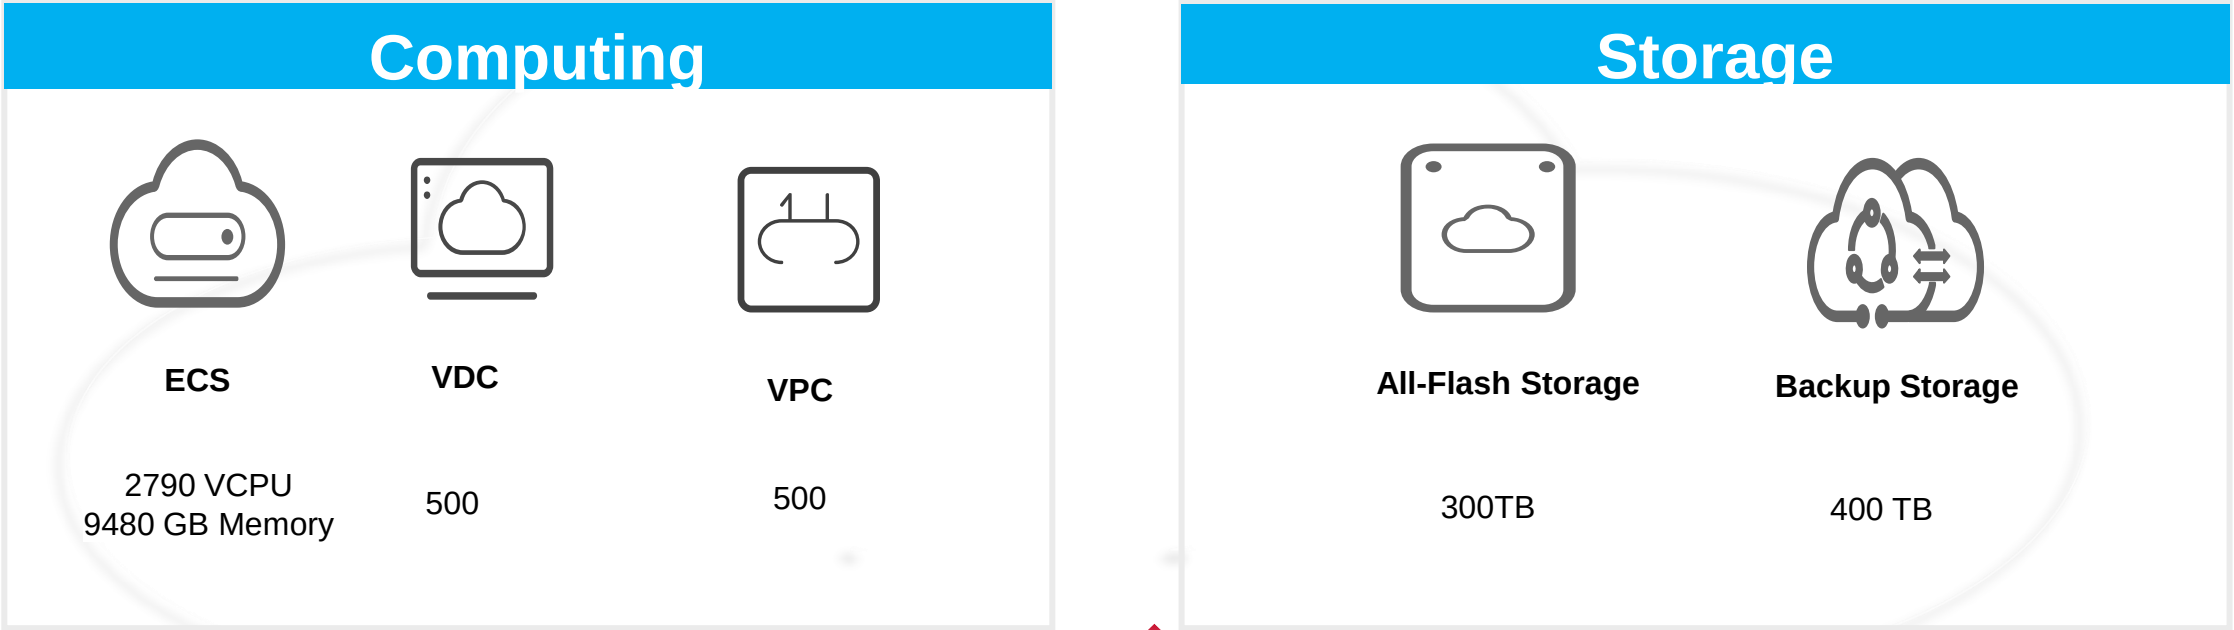

Management zone

- 2*10GE Switch
- 3*Manager Node
- 2*Mgmt FW(URL/IPS/AV)

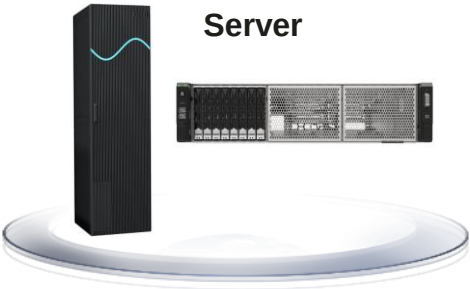

Service zone

- 8*10 Switch
- 10*Compute Node
- 3* Network Node
- 1* All-Flash NVMe Storage
- 1* Backup Node
- 1* Backup Storage
